

BUG REPORT

1. HomePage : Sorting should work when clicking on columns of the table.

Steps to Reproduce :

- a. Open Computer Database website
- b. Click on the column names of the table displayed
- c. the url of the page is changing which tells that the selected column is expected to be sorted

Actual Behaviour : After clicking on the column of the table the list do not ge sorted alphabetically.

2. Edit Computer Page : Edit Computer details changes the introduced date.

Steps to Reproduce :

- a. Open Computer Database website
- b. select any computer by clicking on the name of the computer
- c. Edit computer page will open
- d. change the computer name to something unique
- d. change the introduced date to "0001-01-01" as mentioned in the expected format
- e. save these details
- f. the computer details will show the new name but the introduced date do not match

Expected : 01 Jan 0001

Actual : 03 Jan 0001

3. HomePage : After filtering the list by any unique name the pagination fails.

Steps to Reproduce :

- a. Open Computer Database website
- b. put filter as "Z" and submit the filter
- c. Note the total computers' count found in the header and the footer (current field of pagination)
- d. click next

Expected Behaviour : The total number of filtered computers should not change in the header of the page and the footer in pagination.

Actual Behaviour : The total number of filtered computers is changed in the header of the page and the footer in pagination.

4. Add Computer Page : The validation for introduced date/Discontinued date is not working as expected.

Steps to reproduce :

- a. Open Computer Database website
- b. navigate to Add a Computer page
- c. put the introduced date/Discontinued date as 01-01-01 which is not as per the specified expression of "yyyy-mm-dd"
- d. give a name to the computer

Expected : An error highlight should be shown on the introduced date/Discontinued date

Actual : The date is expected as 03 Jan 0001

5. Add Computer Page : There is no validation for longest possible computer name, if the name is too long it breaks the homepage design when saved

6. Add Computer Page : There is no validation for introduced date being earlier than the discontinued date, in practical situation this should not be the case
